Garden Overview

Location Information

Location: {'zip_code': 'K1A 0A6', 'city': 'Ottawa', 'state': 'ON', 'usda_zone': '5a', 'last_frost_date': datetime.date(2024, 5, 15), 'first_frost_date': datetime.date(2024, 10, 1), 'growing_season_days': 140, 'climate_type': 'Continental'}

Climate Zone: 5a

Selected Plants (3 varieties)

Tomato Vegetable
Lettuce Vegetable
Carrots Vegetable

Tomato

Vegetable
Tomato

Basic Information

Category: Vegetable
Sun Requirement: full sun
Water Needs: regular
Days to Maturity: 75

Growing Instructions

Soil Preparation

Prepare well-draining soil with compost Ensure pH is between 6.0-6.8
Choose a sunny location

Planting Instructions

Start seeds indoors 6-8 weeks before last frost Transplant when soil is warm and nights stay above 50°F Plant deep, burying 2/3 of the stem

Care & Maintenance

Water deeply but infrequently Provide support with stakes or cages Mulch around plants to retain moisture Remove suckers for better fruit development

Harvesting

Harvest when fruits are fully colored but still firm Pick regularly to encourage continued production Harvest green tomatoes before first frost

Common Problems & Solutions

Watch for hornworms and remove by hand Prevent blight with proper air circulation Use row covers early in season for protection

Lettuce

Vegetable
Lettuce

Basic Information

Category: Vegetable

Sun Requirement: partial shade
Water Needs: consistent moisture
Days to Maturity: 45

Growing Instructions

Soil Preparation

Prepare loose, well-draining soil rich in organic matter Ensure pH is between 6.0-7.0 Choose location with morning sun and afternoon shade

Planting Instructions

Direct sow seeds 1/4 inch deep Space rows 12 inches apart Can succession plant every 2 weeks

Care & Maintenance

Keep soil consistently moist Provide partial shade in hot weather Thin seedlings to proper spacing Use row covers for protection

Harvesting

Harvest outer leaves when 4-6 inches long Cut entire head at base when mature Harvest in cool morning hours

Common Problems & Solutions

Watch for aphids and spray with water Use beer traps for slugs Row covers prevent most pest issues

Carrots

Vegetable
Carrots

Basic Information

Category: Vegetable
Sun Requirement: full sun
Water Needs: regular
Days to Maturity: 70

Growing Instructions

Soil Preparation

Prepare deep, loose, sandy soil free of stones Ensure pH is between 6.0-6.8 Work soil to at least 12 inches deep

Planting Instructions

Direct sow seeds 1/4 inch deep Plant in rows 12 inches apart Thin to 2 inches apart when 2 inches tall

Care & Maintenance

Keep soil consistently moist until germination Thin carefully to avoid disturbing remaining plants Mulch to retain moisture and suppress weeds

Harvesting

Harvest when tops are 1/2 inch diameter Can leave in ground until needed Harvest before ground freezes

Common Problems & Solutions

Use row covers to prevent carrot fly Rotate crops to prevent soil-borne diseases Remove any cracked or damaged carrots promptly

Garden Layout Guide

Plant Spacing Requirements

Plant	Spacing	Depth	Sun	Water
Tomato	24 inches	0.25 inches	full sun	regular
Lettuce	6 inches	0.25 inches	partial shade	consistent moisture
Carrots	2 inches	0.25 inches	full sun	regular

Layout Tips & Best Practices

- Plant tall crops on the north side to avoid shading shorter plants
- Group plants with similar water needs together
- Consider companion planting benefits
- Leave pathways for easy access and maintenance

Estimated Garden Area: 12 square feet (estimated)
